

Welcome!

BLUE BYTE SYSTEMS INC. provides specialized products and consulting services designed to improve engineering efficiency, data management, and process automation for companies using SOLIDWORKS and SOLIDWORKS PDM.

Our solutions help organizations streamline repetitive tasks, automate publishing and migration workflows, improve data quality, and customize SOLIDWORKS PDM to better support their business processes.

PDMPublisher

[PDMPublisher](#) streamlines the conversion and publishing of files within your SOLIDWORKS PDM vault. This powerful add-in automates routine tasks, supports a wide range of file formats, and offers advanced configuration options to match your workflow. By reducing manual effort, it helps you save time and minimize errors.

NOTE

Many companies use PDMPublisher because it can create and merge PDFs quickly and reliably compared to the standard [SOLIDWORKS PDM Convert task](#). PDMPublisher is designed for larger publishing workflows where stability, speed, and fewer failed exports are important.

PDMPublisher is one product with one code base, available in two versions.

[PDMPublisher \(Task\)](#)

- Runs as a SOLIDWORKS PDM Professional task add-in
- Use it for centralized, vault-based export automation
- Best when exports should be configured by administrators and executed through the PDM task framework

[PDMPublisher for SOLIDWORKS](#)

- Runs as a SOLIDWORKS add-in
- Use it for exporting directly from the SOLIDWORKS desktop application
- Best when users need an interactive publishing workflow or when using SOLIDWORKS without PDM Professional
